Contents

1	Context	2
2	Justification	2
3	Scope	2
4	Methodology and Rigor	2
	References	3

1 Context

This section defines the framework within FIB, the concepts of Optical Music Recognition (OMR) [1], the problem being solved, and the stakeholders involved.

2 Justification

This section compares existing solutions and justifies why a custom Deep Learning approach is necessary for reading Jazz fonts.

3 Scope

Here we define the main objectives, sub-objectives, functional/non-functional requirements, and potential risks.

Figure 1: Example of a figure legend. Elaboració pròpia.

As seen in Figure 1, references to figures must be explicit in the text.

4 Methodology and Rigor

This section details the Agile methodology used and the tracking tools (e.g., GitHub Projects) to ensure objectives are met.
